Who We Are

The PES has over 1,600 members representing the multiple disciplines of **Pediatric Endocrinology**. The members are dedicated to research and treatment of children with endocrine disorders: reproductive, bone, thyroid, diabetes, obesity, growth, pituitary and adrenal. The Society works to promote the continuing education of its membership.

Mission

To promote and advance the endocrine well-being of children, adolescents and young adults and support the professionals who work on their behalf.

Vision

To be the professional home and voice of pediatric endocrinology in North America.

Goals

Goal 1	Goal 2	Goal 3	Goal 4	Goal 5
Grow the pediatric endocrinology workforce to meet demands.	Maintain a robust infrastructure that furthers our mission.	Optimize member value through education, programs and services.	Optimize care of children with endocrine conditions.	Optimize effective, transparent and open communication of Society activities.

Members from:

- 🌐 50 States and DC
- 🌐 Canada
- 🌐 28 Other Countries

45% of members from Academia,
with the rest from private practice,
government, industry and more.

74% of Board Certified Pediatric
Endocrinologists are members.

Join the MAP Program

As a PES Mission Alliance Partner, your company directly supports the goals set forth in the strategic plan of the society and allows PES to strengthen and demonstrate our priorities in the areas of :

- ✓ education, training and workforce development
- ✓ research
- ✓ patient care
- ✓ patient access
- ✓ public advocacy

Introduction to PES Mission Alliance Partners

The Board of Directors and the Membership of the Pediatric Endocrine Society are pleased to present our model for the Society's relationship with the Health Care Industry: PES Mission Alliance Partners (MAP). We recognize that many entities that participate in the field of endocrinology and diabetes have missions and values that are directly aligned with those of PES, and invite the opportunity for the perfect alliance to support our members and the patients for whom we provide care.

We envision the development of strategic partnerships between PES and MAP members to accomplish our shared goals. Moreover, we foresee an important transition from thinking about what the Society and companies can acquire from each other to one that focuses on what we can achieve together. As its name implies, it is our sincere hope that MAP will join with PES to navigate the complex currents of the changing healthcare landscape and together chart a course toward a vibrant future for pediatric endocrinology and for the patients and families to whom we are committed.

At the same time, this model promotes greater value for our strategic partners, greater transparency about the relationships that the Society has with stakeholder organizations and increased financial predictability for all. The core of this model is a fixed financial contribution to PES in **support of the Society's goals** of education, training and workforce development, research, patient care, patient access, and public advocacy. This fixed contribution is paired with societywide recognition of sponsorship and the intention is for this contribution to eventually take the place of specific grant requests, providing greater MAP member value and greater financial predictability to both PES and our partners. This model also includes a tiered MAP membership structure that allows businesses and other entities to take into consideration their own mission and alignment with goals of PES to determine the degree to which they aspire to commit to this partnership.

MAP Program Benefits

COVID Adaptions

PLEASE NOTE, at this time, the 2024 Annual meeting and Spring Retreat are scheduled to be in person, should that change making a virtual offering the only option, we will still have opportunities for the MAP to exhibit your products and/or have a product theater. We will host the January 2024 MAP/ Board meeting in person, and the Virtual MAP spotlight that was designed to provide additional value year-round on the PES website will continue in 2024. We will continue to hold virtual satellite symposia throughout the 2024 calendar year for those interested in sponsorship of a virtual industry sponsored symposia (ISS). (see separate applications for ISS and meeting exhibit and sponsorship details).
